DETAILED ACTION

Claims 1-23 are present within this instant examination. Claims 2-3, 14-15, and 21-22 have been canceled by the applicant as indicated within applicant's correspondence on 12/6/2007 noted within the first paragraph on page 6. Therefore Claims 2-3, 14-15, and 21-22 will not be given further consideration within this examination.

Priority

Acknowledgment is made that no priority is claimed for this application and as such the filing date, 12/30/2003, is being used for this examination.

Response to Arguments

Acknowledgment is made that the prior 35 U.S.C. 112 second paragraph issues have been corrected and therefore the prior 35 U.S.C 112 second paragraph rejection(s) is/are respectfully withdrawn at this time.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

Claims 1, 4-13, 16-20, and 23 are allowable.

The present invention pertains to demodulating an input containing a test data pattern with coding which comprises both a scrambling code and spreading code. The claimed invention recites features such as: "... a demodulator configured to correlate in input data with a plurality of codes; a test data pattern generator configured to spread an input test data with at least one of the plurality of codes to form a spread test data, and to provide the spread test data to the demodulator; and a multiplexer configured to

multiplex the input data and the spread test data to the demodulator; wherein at least one of the plurality of codes comprises a scrambling code and a spreading code."

None of the prior art of record, either taken by itself or in any combination with any other prior art would have anticipated or made obvious the following limitation combination within the above limitations at or before the time the invention was filed: "...a demodulator configured to correlate in input data with a plurality of codes; a test data pattern generator configured to spread an input test data with at least one of the plurality of codes to form a spread test data, and to provide the spread test data to the demodulator; and a multiplexer configured to multiplex the input data and the spread test data to the demodulator; wherein at least one of the plurality of codes comprises a scrambling code and a spreading code."

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
